

‘Revolutionize the way vehicles are lifted’

Gaither Lift Bag Tech Cat. No. GAIRDB20A

- Low Profile
- Two Ways to Lift
- Durable
- On The Road Service
- Portable
- Easy To Operate
- Fast Lifting
- SAFE To Operate
- 3 Year Limited Warranty

The Gaither Lift Bag system will help you revolutionize the way vehicles are lifted. This **low profile** unit will fit under any vehicle currently on the market. This amazing tool is operated by air only – no more hydraulic lines or parts to malfunction. The Lift Bag comes with a limited **Three Year Warranty**.

‘Two Ways To Lift’ – under the axle or drive right on and durable enough for dual axles.

The bag construction is strong, **durable and long-lasting**. Stainless steel base plate protects the bag from puncture enabling the unit to be utilized on soft or uneven terrain.

No More Crawling Under vehicles! The Lift Bag is lighter weight than comparable hydraulic jacks and is easily maneuverable. Long hoses are provided so inflation occurs from a **safe** distance.

20 Ton Lift Capacity!

Safe to operate. Jack stands are always recommended, however, the Lift Bag not only lifts the load but is designed to sustain the load. **Fast Inflation** – lifting to full height in seconds, the Lift Bag can be operated using a compressor as small as 1.5 HP.

The **Low Profile** Lift Bag easily slides under cars, auto carriers, buses, tractors, forklifts even military tanks!

The lift bag is **portable** and is easily maneuvered using handles and front wheels.

The 'Lift Bag' unit shown here includes an optional 'Height Adaptor'. The optional 'Height Adaptor' is placed in the center of the Lift Bag as shown. Tech Cat No. for the Height Adaptor is, **GAIRDB20A-HA**. Please order separately!

The Lift Bag is simple to operate using a 'joy stick'. There is only one control to raise and lower the unit. Simply connect an air line and go!
