PSTP	Program Interface Module	Each
PSTM	Mitchell TPMS Manual	Each

In stock and available for immediate delivery from KTI, Position sensor tool, holster, programming interface module and Mitchell TPMS guide.

One tool does it all!

- PST allows you to trigger all OEM TPMS on the road today.
- The Position Sensor Tool (PST) triggers both magnetically and electronically triggered TPMS sensors.
- The Holster (PSTH) is available for convenience and to prevent damage to the PST Tool.
- The Programming Interface Module (PSTP) allows you to program the PST Tool with the most current software when new sensors become available.
- The Mitchell 1 TPMS Guide (PSTM) is a **must have** quick reference guide that covers all domestic and import vehicles equipped with Tire Pressure Monitoring systems through model year 2005.
- Training on the use of KTI PST and TPMS is available through Tech International.

Coming Soon! TPMS Replacement Parts Kit
