

Introducing... the next generation of **CENTECH®** Radial Repairs

THERMACURE

Tech's new Centech Thermacure repairs offer superior performance in retread and section mold applications.

- ❖ New Black Thermacure Cushion Gum cures at a wide variety of temperatures from 210°F (99°C) to 320°F (160°C).
- ❖ Ideal for use in virtually all retread systems and section molds.
- ❖ Used with black cement such as Temvulc in heat cure applications which eliminates the need for chemical cements.
- ❖ Offered in same box quantities as regular Centech repairs
- ❖ Sizes include 111R All Purpose, CT10HDR, CT12HDR, CT14R, and CT20R through CT44R.

Simplifies application by allowing the use of black cement for the repair and fill rubber when repairing through a retread system or section mold. Thermacure repairs have the same shelf life as regular Centech repairs.
